

New Product Introduction

Aqua Adapt Marine PC System

Available Now SRP \$1495.00

UPC: 081159830144

PART NUMBER: ZDIGAQUAD

Aqua Adapt Features

- Rugged fan-less (passively cooled) powerful Intel i3 based PC for charting, navigation, entertainment, office and general on board applications
- Direct boat DC operation (8-19v) with just 20-25W power consumption
- Totally solid state no moving parts with ultra fast 60GB hard drive
- Latest Windows 8.1 compatibility
- Dual HDMI video outputs for two independent monitors
- 8GB RAM & 60GB solid state hard drive
- 5 USB ports, 10/100/1000MB LAN port
- Very compact and ultra rugged
- Totally silent with Intel HD superior audio output (Surround 7.1) via HDMI if required (ideal as a media centre)
- \$1495 MRP

Applications:

PCs on boats are becoming more and more ubiquitous and its easy to see why – they offer a great solution for electronic charting, communication and entertainment. Many users start with a laptop but soon realise that they are impractical on board and can be unreliable too with the constant boat vibration and climate. They also take a lot of DC power.

Aqua PCs are designed for the marine environment with ultra low power consumption, direct DC operation (no inverters or AC power) and a solid state hard drive for exceptional reliability. They are value priced yet offer exceptional performance and if you're looking to create a chart table navigation station, they offer a fantastic solution.

- Charting and Navigation
- 2nd Station navigation at chart table
- Internet & Communication
- Entertainment Music, Photos, Video,
 Document Storage & Books
- Ship's office
- Port monitoring & control

PARTNER UPDATE

USB-NMEA Cable Bi directional USB to NMEA 0183 cable suitable for 4800 and 38400 baud operation

MUX100 2 channel

adaptor as above

NMEA 0183 Multiplexer Combines a 38400 and 4800 baud NMEA input into a single output for connection to a USB-NMEA

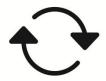

GPS150 DualNav GPS- GLONASS USB Sensor

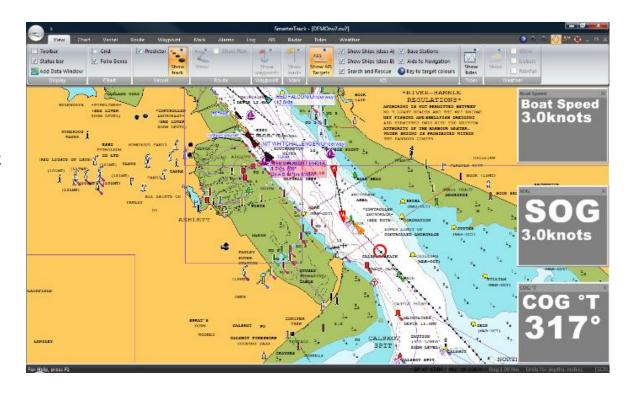

Ideal positioning sensor with DualNav capability. With USB or NMEA interface capability

Aqua Adapt Navigation Software – SmarterTrack SRP \$399.95

- Navionic's based navigation software
- Full instrument, GPS and AIS integration
- Share your Navionic's cartridge data on the PC navigation system – no extra charts to buy
- Powerful routing, tracking and waypoint capability
- Weather overlays
- Ideal for use with Adapt PCs

Coming Soon – Aqua Adapt Interfaces

The new AD20 will by physically similar to the Adapt PC and will incorporate an NMEA 2000 and NMEA 0183 interface to allow easy integration into a vessel's navigation system

The AD30 communications interface will offer hi power wifi connectivity (like our WL510)

These interfaces are scheduled for July 2014
