System

AquaMedia brings digital entertainment on board

AquaMedia is an on-board media server designed to bring the latest in entertainment technology to your boat. Playback music, video, pictures or internet TV and integrate with your existing or new boat audio and TV system.

With a stunning, easy to use interface and blisteringly fast processor, AquaMedia brings you the best and latest in media entertainment afloat.

3"

Compact – Only 8"

Functionality
AquaMedia AQM200

Step on board and plug in your USB drive including audio, video and photo media for on board playback

Aquamedia will quickly index the drive and logically arrange the media through its custom Razor operating system

AquaMedia also supports audio playback via AirPlay via iOS devices like iPhones and iPads

Connect AquaMedia via HDMI to your choice of TV or display and via an AUX connection to the boat's audio system

Connect to the internet for web and internet TV functionality via built in wifi or through the WL510 power wifi solution from Digital Yacht
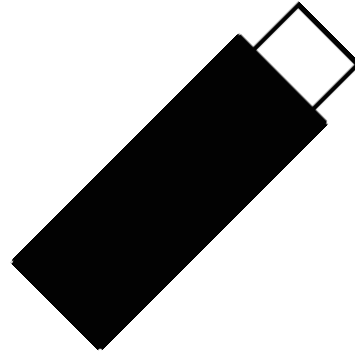

Key Features
AquaMedia AQM200

1080 HD + **1080 HD** Dual HDMI video connection (supports independent resolution)
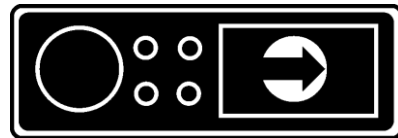

CCTV Display CCTV/Video from IP cameras

Bring your media on board via any USB storage device for unlimited storage
