# DIGITAL YACHT

MOB Alert

Simple push button operation & easy installation - just plug into universal NMEA 2000 backbone

Easily install additional low cost activation switches, outboard kill cord devices or a 3rd party blue tooth tag

NAVAlarm

MOB Alert generates a synthetic AIS MOB Sart messsage activating theMOB alarm on AIS compatible plotters. The industry standard MOB PGN is also generated for maximum compatability across all navigation systems.

NAVAlarm is an optional accessory that also connects to the NMEA 2000 network. It activates a 102dB sounder when the MOB alert is received. It can also be set to activate for other NMEA 2000 alerts with alternative tones and volume levels - eg Depth, Engine Overheat, Off Course etc

INDUSTRY STANDARD NMEA 2000 CONNECTIVITY

Simple - Safer - Boating - For Everyone
